

REVIEW

on the monograph „The social- pedagogical and legislative bases of the student sport development in the Republic of Moldova”, author Triboi Vasile

This monograph has the purpose to distinguish the factors that hinder the development of sports (including university sports) in the Republic of Moldova. This material will surely help to eliminate the gaps in the legal framework of the university sports in the Republic of Moldova in order to bring it in line with the modern requirements.

At the same time, the present material aims a practical approach to the development aspects of the university sport, thus as to increase their activity level, their efficiency and the major possibilities to develop the native sport.

The work presented by Mr. Triboi Vasile, PhD, university professor, is of a strictly actuality, because, through his conceptual theoretical and empirical investigations, he aims to improve the professional training of future highly qualified specialists by determining the general principles for the formation of pedagogical bases for the functioning and developing the management of sports facilities under market economy conditions.

The monograph of Mr. Triboi V. has a logical structure outlining the consistent algorithm of the main compartments, which ensures the multilateral exposure of the theoretical, methodical and empirical approaches in accordance with the aim and tasks of the research.

Those mentioned above, allow me to say that the present work on the topic: „**The social-pedagogical and legislative bases of the student sport development in the Republic of Moldova**” elaborated by Mr. Triboi V., university professor corresponds to all the requirements and we propose for its approval to the SUPES Methodological Committee.

Budevici-Puiu Anatolie,

PhD., university professor, SUPES
