

REVIEW

on the monograph „The social- pedagogical and legislative bases of the student sport development in the Republic of Moldova”, author Triboi Vasile

The experience of the last decades clearly demonstrates that economic and political successes obtain those states that pay sustained attention to young generations. Only those countries that have revised the traditional system aiming the new generation, relations between generations and their overall share over the social and economic development of society prove to be stable.

This monograph has the purpose to distinguish the factors that hinder the development of sports (including university sports) in the Republic of Moldova. This material will surely help to eliminate the gaps in the legal framework of the university sports in the Republic of Moldova in order to bring it in line with the modern requirements.

The content of this scientific work is presented in a volume of 267 pages and includes the following sections: “Introduction”; Chapter I – covers the problems of legal assurance in the development of student sport; Chapter II – student sport from the Republic of Moldova, as an object of social, normative and legal regulation; Chapter III – the theoretical bases of the formation and argumentation of the system of social, pedagogical, normative and legal assurance of the development of student sports in the Republic of Moldova and “Bibliography”, which contains 256 bibliographic nominations in Russian, Romanian and English.

As a completed scientific work, the monograph has a logical structure presenting the consistent algorithm of the main compartments, which ensures the multilateral exposure of the theoretical, methodological and empirical approaches in accordance with the purpose and tasks of the research, resulting from the clear representation of the working general hypothesis, object and subject of examination.

This work has a logical construction, in which the developing substructures are algorithmized in a common integrity, and the textual aspect possesses editing and scientific language in accordance with the respective contemporary requirements, thus forming the characterization of the independent, completed work.

Those mentioned above, allow me to say that the present work on the topic: „The social, pedagogical and legislative bases of the student sports development in the Republic of Moldova” by Mr. Triboi V. corresponds to all the requirements and we propose it for approval to the Methodological Committee of the SUPES.
